

Canberra Rocketry Group COVID-19 Safety Procedures

(Rev. 1.1 April 2021)

Visit the NSW Health website www.health.nsw.gov.au for further information.

However, for our launches we ask that you observe the following:

- Do not attend if you feel unwell or have flu-like symptoms.
- All attendees will provide name and contact numbers upon arrival, unless already registered with the CRG. However, in the case of minors and school groups, this information will only be kept by their guardians or supervisors. Alternatively, for those with mobile devices with the *Service NSW* app installed, we do have a QR code that can be scanned.
- Exercise social distancing at all times. Masks are optional but should be available if necessary. We will have a limited stock of these, if necessary.
- Hand sanitiser will be available for all attendees at you preparation bench and at the LCO bench, but you would be advised to bring your own as a precaution.
- Obey all instructions given by CRG supervisors.
- Remain behind the orange rope line at all times except for when you are installing rockets on the launch racks and when retrieving your rockets.
- The LCO or RSO will complete your launch sheet details to avoid unnecessary physical contacts.
- The RSO will perform a contact-less inspection of all rockets for airworthiness. It might be required for the flyer to disassemble the rocket to confirm or rule out any safety concerns.
- The flyer will install the rocket on the pad under the supervision of the RSO or other appropriate CRG member. Please limit the number of people at each launch rack to one individual flyer or group of two.
- Flyers should use hand sanitizer after loading their rocket on the pad and return to their preparation area behind the orange line.
- Supervised flyers will not be permitted to operate the launch control system. This is to limit unnecessary physical contacts.
- There might be other requirements on the day depending on circumstances. We will have a safety briefing prior to the first launch.
- If you have any concerns or questions about safety or the range operations, please speak to one of the CRG supervisors.
